Website Updates

The website has been updated to include a link that goes directly to the Troy Landscape Lighting portion of their website. This can be found by visiting the website at www.callite.com and clicking on the “Manufacturers Tab”. This tab also includes all of the manufactures we sell, their logos, and links to their websites. This is an easy way for you to look at their websites and explore the products they have to offer.

Anti-Seize Lubricant

With the industry quickly moving towards LED lighting the issue of metal seizure is more of a problem than ever. Over time, screws, bolts, and threads used in most fixtures tend to freeze up. Minute amounts of moisture carrying minerals seep into the spaces between surfaces and eventually can cause maintenance issues. LED technology may even make this problem even more pronounced because of the extended periods between required maintenance.

One product on the market that works well in preventing metals from seizing comes from Permatex. Their anti-seize lubricant works well in extreme temperatures and moisture. It can be purchased in a variety of container sizes at most automotive parts supply stores.

Lamp of Choice

Over the years we've found the best manufacturer of 12 volt Halogen MR16 lamps and for us that manufacturer remains Ushio. They offer a wide variety of quality lamps in all wattages and beam patterns. Just as important, Ushio is able to do this at an affordable rate. The reason you'll find this lamp exceptional is the design.

The Ushio Eurostar series of 12 volt MR16 lamps utilizes a multilayer titanium oxide coating on their reflectors. This coating is far more durable than the standard dichroic coating found in lesser quality lamps. This ensures the coating will not crack or peel under the stress of temperature or atmospheric moisture.

For a complete listing of the Ushio lamps we carry visit our website or contact our sales office.
